700M: Supercompact and manual

If the quality of debris and dust isn't particularly heavy (and your budget is low), the 700M is the machine you are loo-king for. Light in weight, of compact design and easy to transport (side brush and handle bar can be folded), the 700M offers high sweeping performance which can be matched to almost any environment by simply adjusting the pressure to the main broom.

Dimesions (L x W x H) mm: 1200 x 780 x 960

700: The smallest powered unit

Available both battery and petrol versions, the 700 is unmatched for performance and manoeuvrability in a sweeper of this size. Designed for working in smaller areas but with high productivity, the 700 combines the performance of a larger machine within the dimensions of a compact unit. Seeing is believing – this is the only way to appreciate the efficiency and sweeping speed, the ease of handling and the total control of dust thanks to the vacuum and filtering system. The easy controls and adjustment of the sweeping system complete the benefits of an excellent machine.

Dimesions (L x W x H) mm: 1160 x 810 x 1000

900: For larger areas

Wider sweeping path and a greater working autonomy (thanks to a larger waste debris hopper) and you have the model 900. it is intended for sweeping in areas where a greater productivity is required. The optimum weight, distribution and the two castor wheels on the front of he machine ensure unequalled manoeuvrability for its size, a most important feature for a walk-behind unit. The 900 is equipped with side broom adjustment from the operator's position and a vacuum shut-off for working in wet conditions.

Dimesions (L x W x H) mm: 1200 x 1000 x 1000

1000: A ride-on sweeper for wide areas

If the area is large and the working load is high, the Dulevo sweeper 1000 has to be your choice. Developed to cover longer distances with excellent sweeping results whilst still maintaining maximum driver comfort, the 1000 is a luxury sweeper, efficient in its work and a pleasure to drive. The driving position, comfort and location of the controls have all been developed to allow long working hours without stress or fatigue. The front steering allows the machine to turn in its own length, giving it outstanding manoeuvrability.

Dimesions (L x W x H) mm: 1615 x 905x 1320

1000HD: Wide area, ride-on sweeper and high dump

The Dulevo traditional concept of comfort led to the HD version (High Dump) with a practical automatic hopper discharge system up to 1450 mm. Directly on board of the sweeper, the operator can easily empty the hopper even into the collection bins. Always respecting the Dulevo tradition, the sweeper 1000 HD is equipped with an efficacious cotton-polyester filtering system, well-known as the most performant filtering system for sweepers.

Dimesions (L x W x H) mm: 1615 x 905x 1320
