Powr-Flite BLACK MAX Extractor

BlackMax Extractors

Item# PFX1085MAX - PFX1385MAX

Available in mid-size and full-size platforms that deliver truckmount power without the truck!

- Patented Perfect Heat® technology maintains the hottest water/solution temperatures in a portable unit
- 1800 watt heater produces temperatures up to 212° F
- Dual 3-stage vac motors provide nearly 50% more waterlift than dual 2-stage vac motors
- Powerful solution pump delivers 1.25 GPM at 500 p.s.i.
- Exclusive handle-mounted transport wheels for easy loading and unloading
- Unit dimensions:
  10 Gallon - 25"L x 20"W x 34"H
  13 Gallon - 35"L x 22"W x 45"H

CLEANTECH

PFX1085MAX - PFX1385MAX

Independent motors, pump and heater switches.

Handle mounted transport wheels for easy loading and unloading.

Patented Perfect Heat® technology

Front mounted pressure gauge on 500 p.s.i. models and recessed brass connector.

MORE POWER, MORE HEAT, MORE RECOVERY

BlackMax combines the power of two 3-stage vacuum motors, a robust 500 psi pump, electric heat and the Perfect Heat® system to give you the most powerful portable on the market.

More Recovery! Two 3-stage vacuum motors deliver 101 CFM of extraction and 220" of waterlift--that's 50% more waterlift than two 2-stage motors!

More Power! The heavy-duty, adjustable 50-500 p.s.i. pump handles the toughest jobs.

More Heat! Not only does the BlackMax have an electric heater, it also uses the patented Perfect Heat® System. Perfect Heat® allows these machines to produce and maintain much higher solution temperatures than traditional heated extractors.

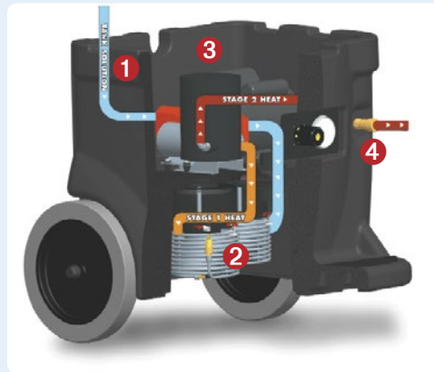

Clam-shell design allows easy access to pump and heater.

Perfect Heat®... here's how it works

BlackMax extractors use two high powered vacuum motors which produce enormous amounts of heat. Perfect Heat® technology captures this heat and uses it to heat the water used to clean the carpets. This unique process requires no additional electric power and is simple and dependable. This process is so unique and so effective that it is patented. No other system can maintain water temperatures as high as Perfect Heat®!

1. **Water is delivered from the tank to the pump.**
2. **The Perfect Heat® coils preheat the water.**
3. **The electric heater super heats the already pre-heated water.**
4. **A steady supply of hot water is sent to the wand.**
